PLANT

Our facility, located in Akyazı, Türkiye, boasts world-class production capacity and a comprehensive pool of state-of-the-art equipment.

MANUFACTURING

The production capability meets the demand in both national and international sleep products markets; including pillows, duvets, pillow protectors, mattress protectors, as well as cushions and decorative pillows for the furniture industry, and down filling services for the textile industry's down jackets.

Founded in 2010, **Maya Tekstil** is Türkiye's first domestic producer of down and feather pillows and duvets. We create natural, healthy sleep products—from signature pillows and duvets to toppers, mattress pads, and protective covers.

Through our “**Maya's Professional**” line, we deliver tailored private-label solutions for retailers, hotels, and the furniture industry, offering flexibility in materials, sizes, quilting, and branding. With strong production capacity and decades of expertise, we serve both premium residential and hospitality markets, including high-volume cushion and pillow fills.

Our end-to-end 360 ° C service covers **product development, production, storage, delivery, and marketing & branding support**, ensuring clients receive not just products, but complete solutions.

Our facility is capable of flawlessly processing all types of natural and technological filling materials together. Various fabrics and filling materials can be combined using alternative stitching methods according to specific needs. From the procurement of high-quality raw materials to product delivery and customer satisfaction, every stage we are involved in is meticulously managed in line with the principle of sustainability.
